Wi-Drive

Store and share your favorite content with your favorite people.

With integrated Wi-Fi and four hours of battery life, Kingston's new Wi-Drive™ offers pocket-sized portable storage and easy file sharing for Apple devices, including iPod touch Gen 3 & 4, iPhone and iPad plus Kindle Fire, tablets, smartphones and more. Accessing or sharing your personal media has never been easier. With Wi-Drive, you can add another 16, 32 or 64GB of space accessed wirelessly from your digital device. The content can be shared by three people so you are no longer limited to the space available on your portable device.

Whether at home, by the pool or on the road, Wi-Drive lets you take more content with you without running out of storage space. Just back-up your files before you go and wirelessly access them from Wi-Drive when you need them.

Kingston's Wi-Drive offers great:

- Portability: Wi-Fi enabled so you can take your favorite media with you — and not be tethered to your computer. Just use your digital device as a player and display.
- Expanded storage: Wi-Drive adds up to 64GB of storage space for more of your favorite music, photos, videos, PDFs and more. It's also a great companion for Windows users on iPads, as it removes the frustration of using auto sync to view content.
- Casual Sharing: Wi-Drive lets you share your favorite media with three users simultaneously — without any hassles.

Access to the drive is done over the 802.11g/n protocol, just like your typical home wireless hub, with a password. Carry extra files and content with you and use your digital device as a display to share information.

Best of all, Wi-Drive is backed by legendary Kingston® reliability, 24/7 tech support and a one-year warranty.

> Works with iPad, iPhone, and iPod touch, as well as Kindle Fire

> Share your data with 3 users simultaneously
